Week Number: 7

No. of hrs. for the week: 32

Report for One Week of Internship

Note: This form is to be submitted each week of the internship.

1. What were your goals in this week? Be as specific as possible.

My goals this week were to do lesson prep and teach my video production class. My photography class ended this week so I had to prepare for the last class. I was also in charge of up keeping the social media accounts and to take team photos for the website.

2. What happened in retrospect? How did you actually spend your time?

This week my video class didn't go as smoothly as I would have liked. We started projects this week using the Nomad Kits the center owns. These are just iPads with lens extenders and some editing software. Unfortunately, when it came time to start filming the audio from the mic input wasn't working. I had checked it the previous day and had no issues. I spent several days messing with settings, making sure the iPads were updated, and anything I could think of to figure out what was going on. I learned one of the lapel mics we own isn't working. I also learned that one of the iPads needed updated and a setting changed before it would work. I added an extra class into the week to make up for what we missed due to the lack of audio. We have officially started projects and we will finish them in the coming weeks. I also was in charge of taking the team photos for the website. This was the first week that everyone from the team was in Cambodia at the same time. We were thankfully able to get some good photos and I will be updating the website next week.

3. What other notes would you make regarding your experience in this period?

I'm really enjoying everything. The students are always eager to learn and it makes teaching so much more exciting. I'm also excited that the team member that arrived this week is interested in learning how to work the website. I will be able to show him how to work everything sometime in the next few weeks.
